Mid-Career
Crisis?
Don't ignore
it!

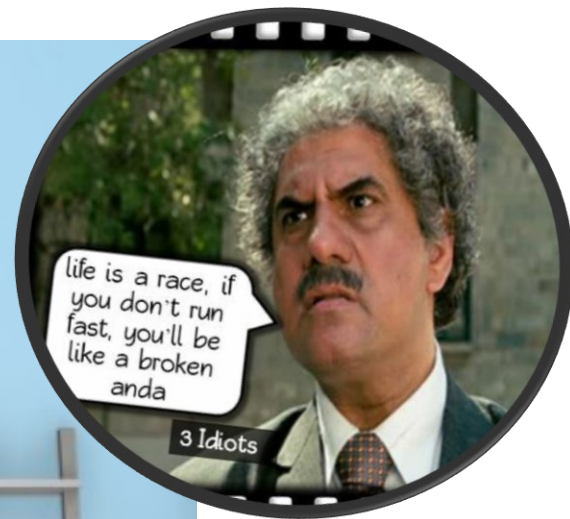

Way forward @
Fast-Track Career to
Fast Forward Success

**infini Institute of Construction
Project Management, Pune**

Recognised centre of EAL, UK

Are you

- self doubting ?
- feeling isolated, unfulfilled, unhappy ?
- experiencing burnout, insecurity ?
- suffering anxiety, mental health issue ?
- **Desiring CAREER change ?**

It's a 'early **career crisis**'..

87% engineers regret for **wasting** "imp. years of life"!

Navigating Career Crisis..

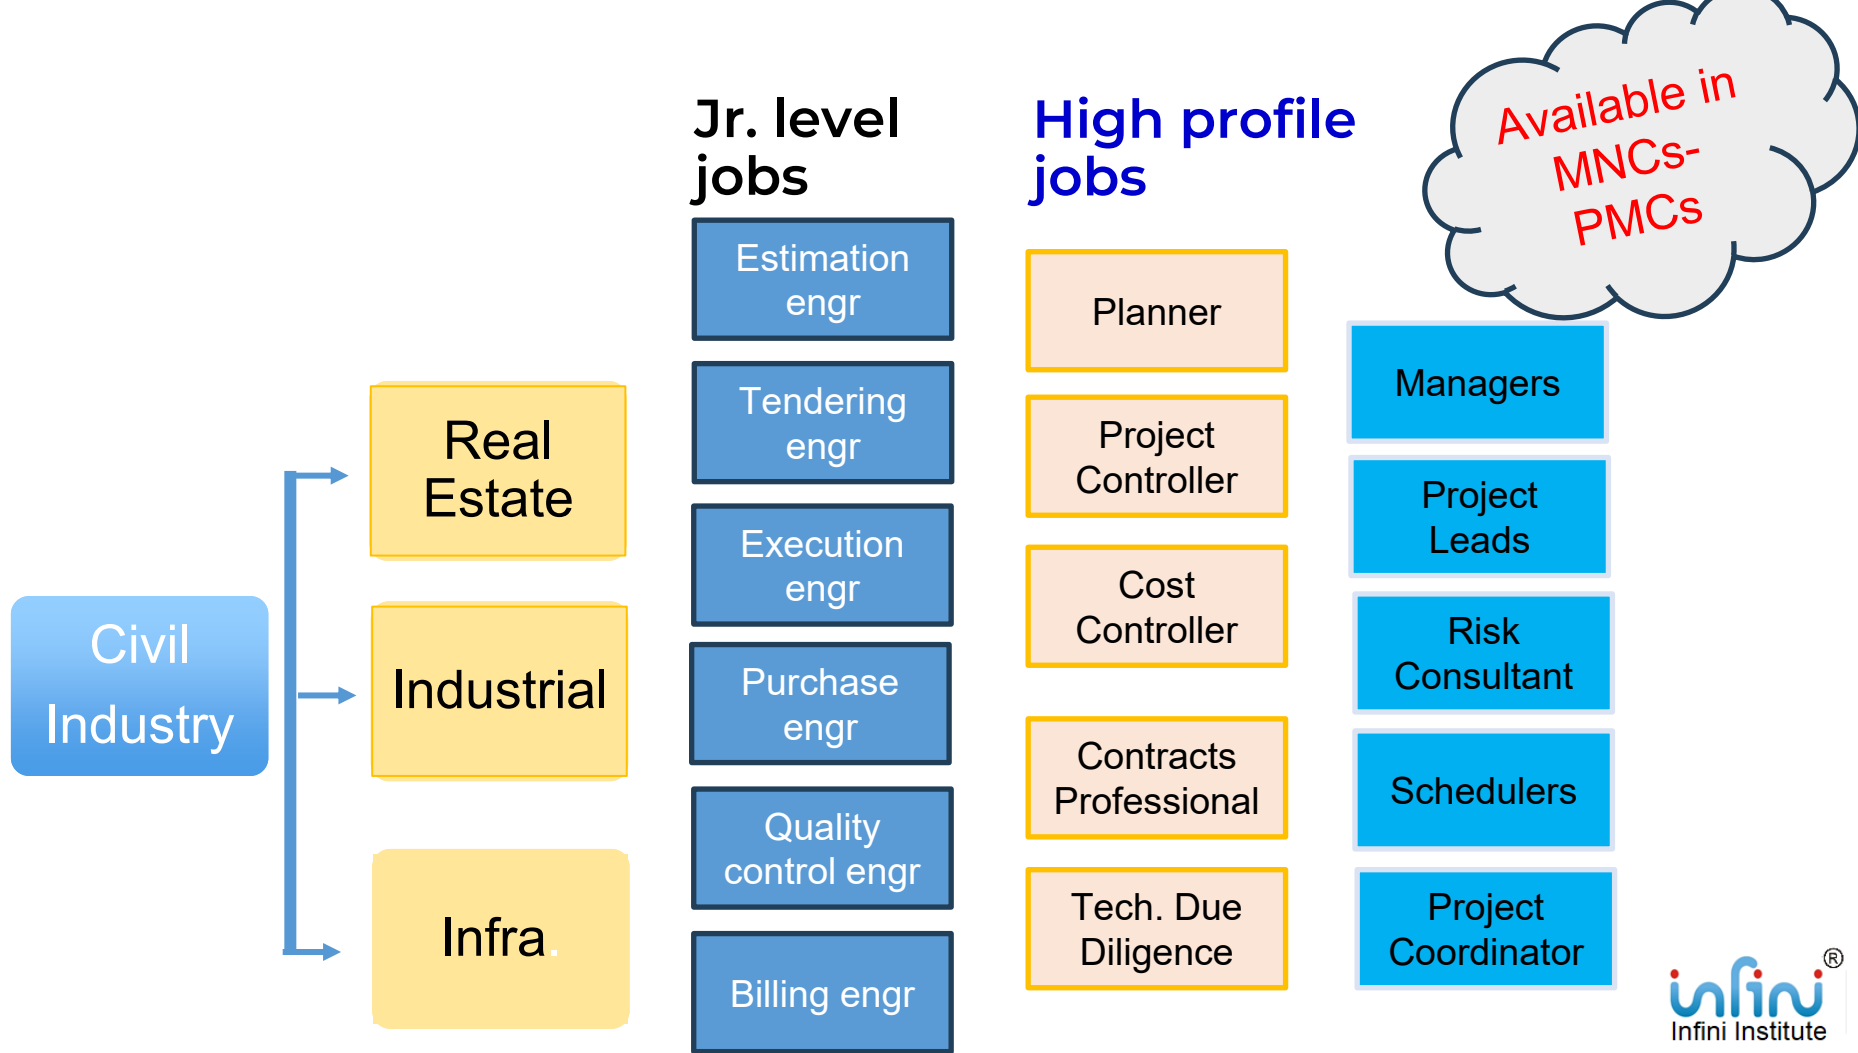

Learning from mistakes..

Mistake 1: Opting job-without-choice

Tip 1:

**Plan a career. Explore options.
Don't be blindfolded to get job.**

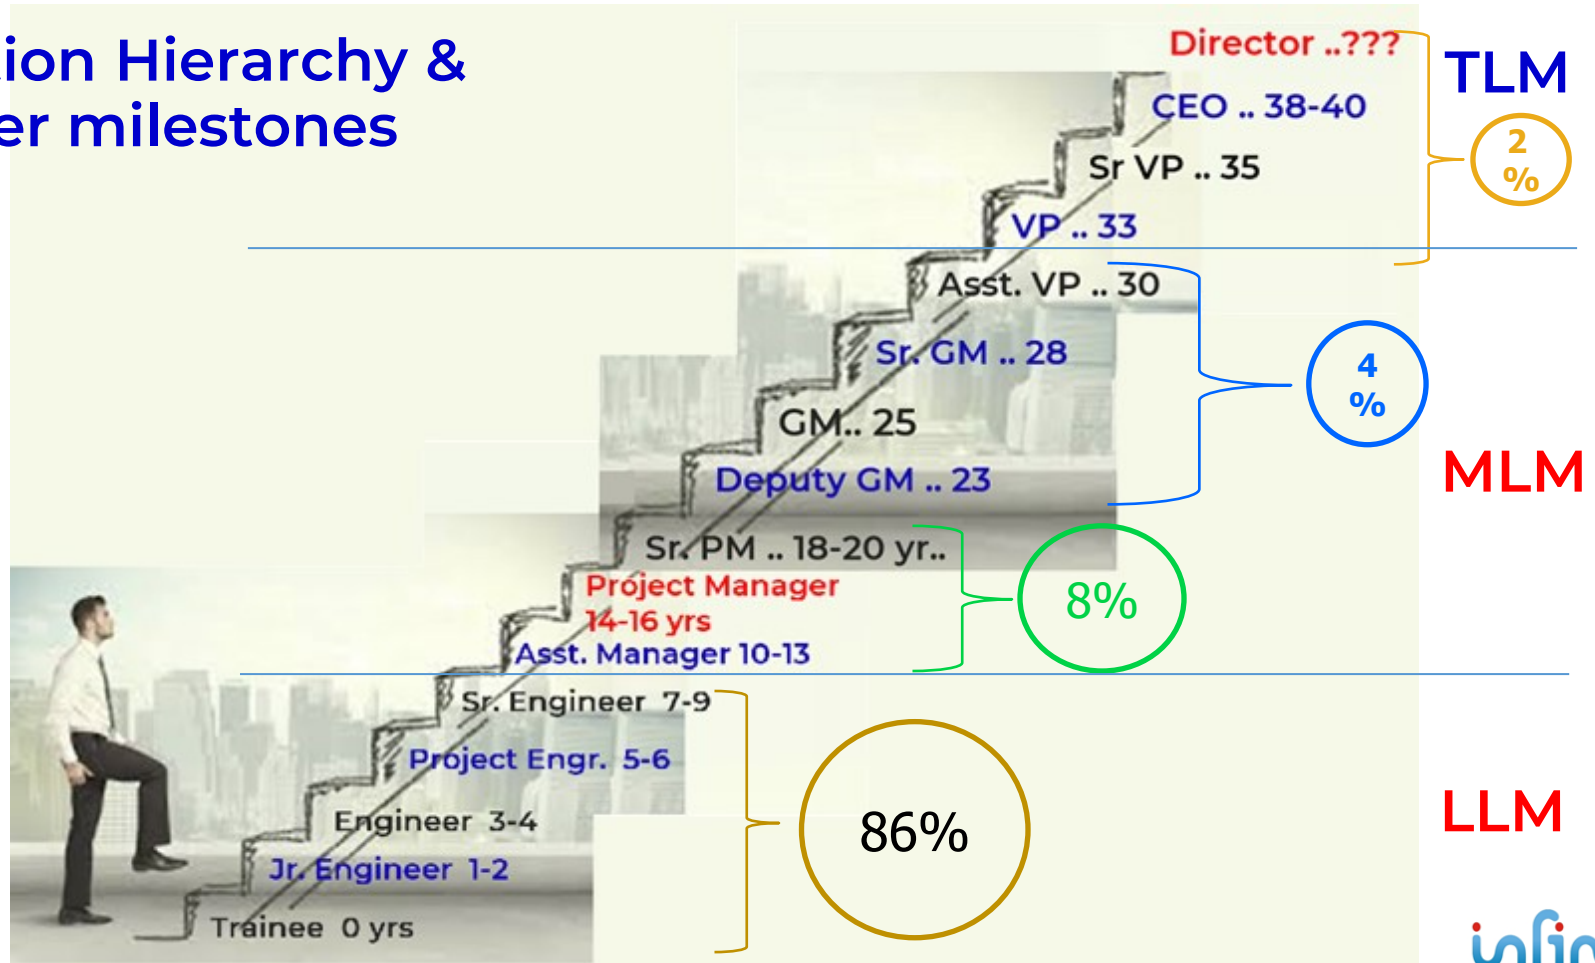

Mistake 2: Easy to get promotions!

Tip 2:

Upskill. Based on experience alone, you can't beat competition & grow faster.

Position Hierarchy & Career milestones

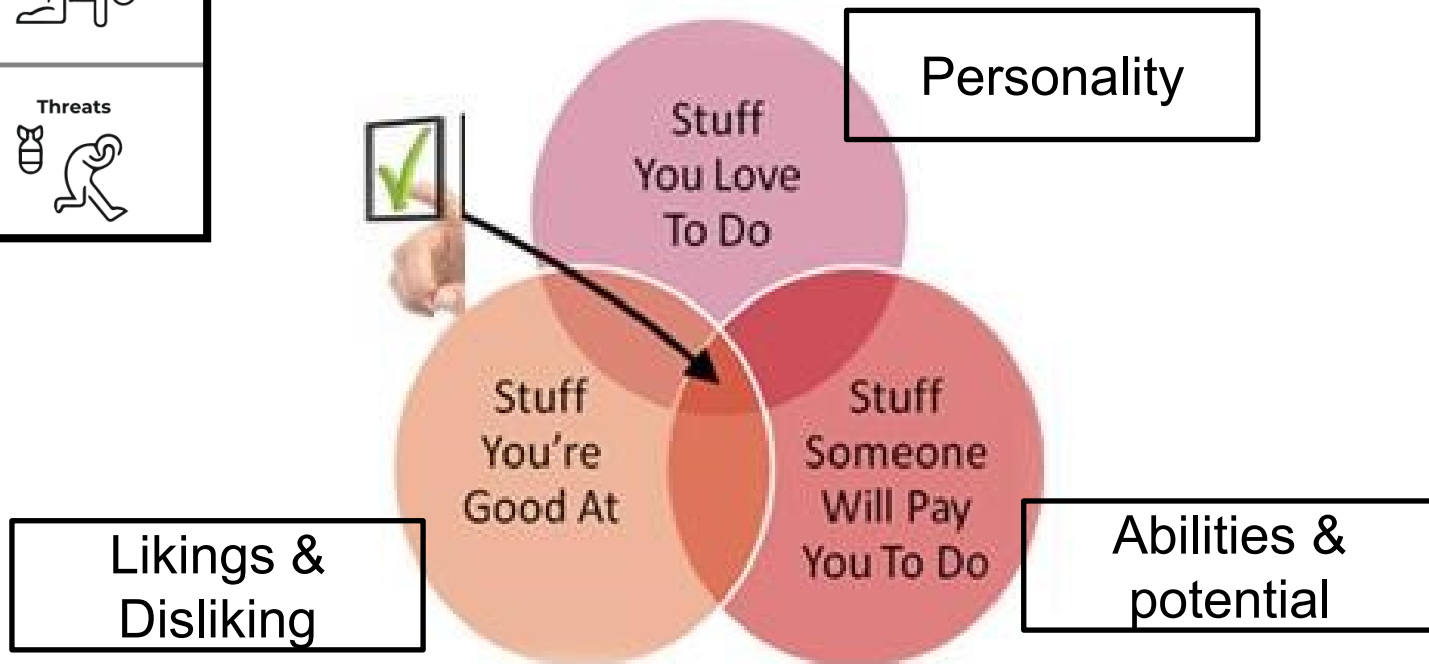

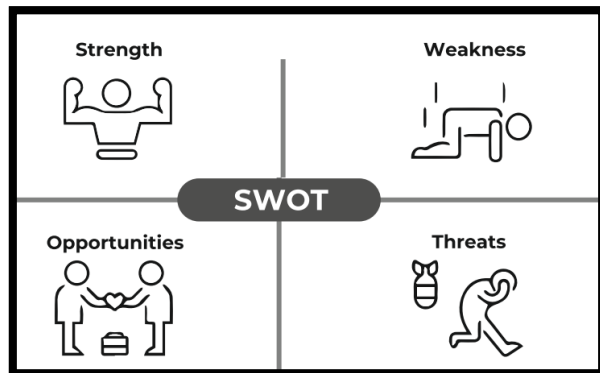

Mistake 3: Unclear 'me' leads to the wrong path

Tip 3:

Stop trial-error. Know thy strengths. Work on weaknesses.

SWOT- Finding the 'real' purpose

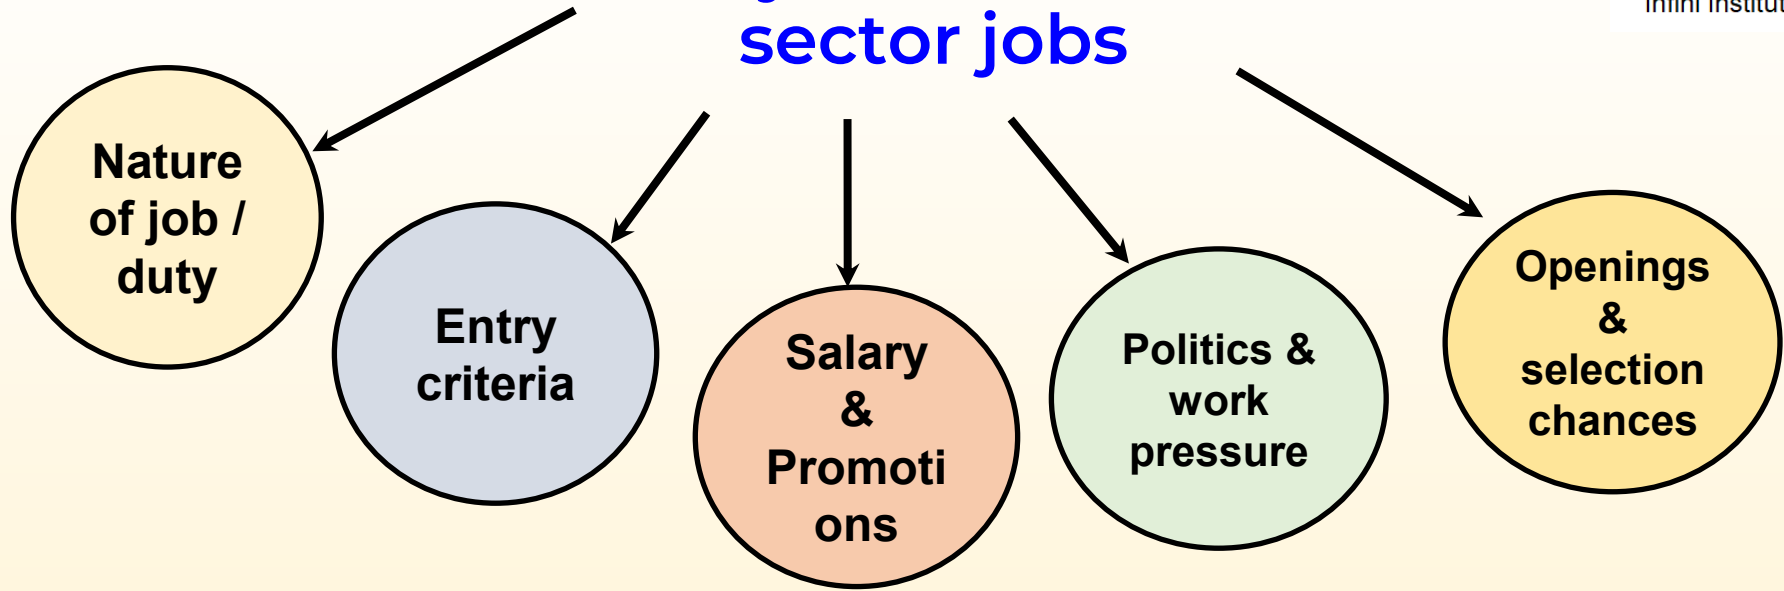

Mistake 4: Hopeless chasing for Govt. Jobs
leads to frustration & waste time.

Tip 4:

Choose private sector for endless
opportunities and early success

Govt. jobs v/s Private sector jobs

Govt. jobs seems lucrative, secured, but are uncertain, risky, stressful, less in vacancies, highly competitive, reservation driven, & having no control on selection. **While private sector jobs are many, certain & provide faster growth.**

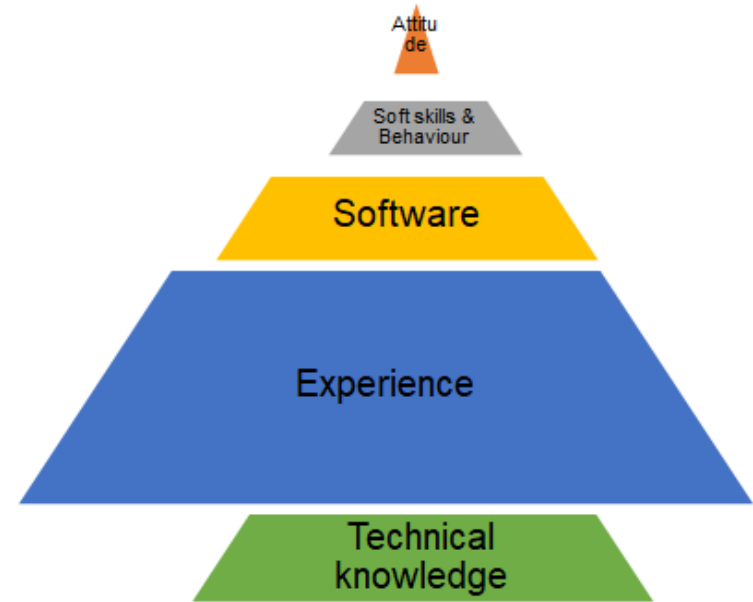

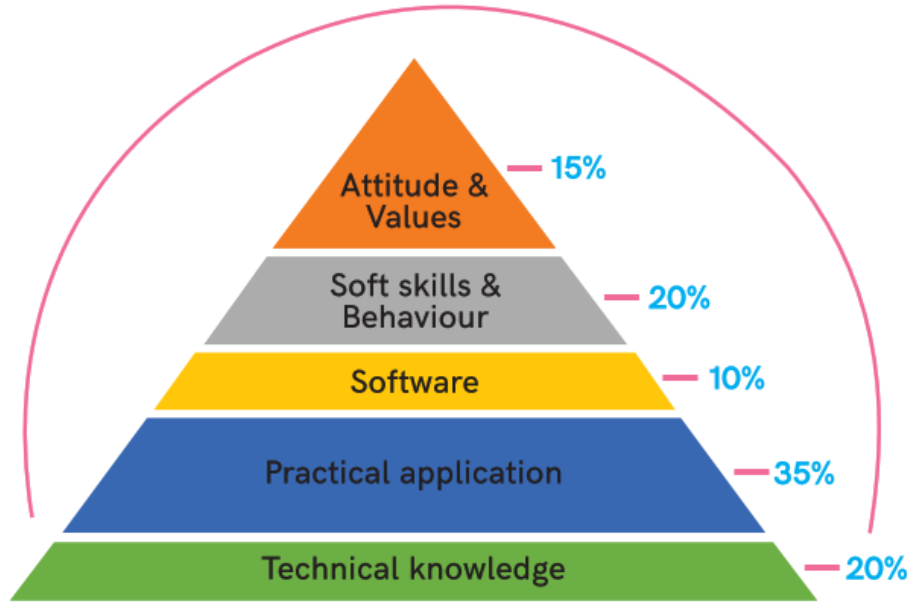

Mistake 5: Imbalanced personality leads to loss of better opportunities

Tip 5:

Build a character to get rewarding career.

A 'balanced Personality' triangle :

Mistake 6: Overlooked Gen. Z issues leading to the more rejections

Tip 6:

Be adaptable & trustworthy

Strengths :

- **Digital natives**
- **Independent**
- **Resourceful**
- **Open-minded**
- **(over)confident**
- **Social & environmental consciousness**

Challenges :

- **More casual**
- **Short attention span**
- **Technology dependent**
- **Instant gratification**
- **Communication issues**
- **Unrealistic expectations**
- **Low resilience**
- **Sceptical, can't stay longer in 1 company**

Mistake 7: I will learn while earn & online course certificates will give me better job

Tip 7:

Empower yourself with skills. Don't get overloaded with mere information.

“

One of the major problems facing the fresh graduates is their insufficient understanding of basic concepts. The lack of in-depth understanding of technical information, lack of client-handling skills and insufficient knowledge across domains are the major skill gaps in the area.

”

Bridge the gap between knowledge & Skills.
Online courses gives you information, can't
build skills. Industry don't value such
certificates.

Mistake 8: No need to plan career. It's not easy!

Tip 8:

**Failing to plan = Planning to fail.
Plan it or face consequences lifetime.**

Consequences of bad career plan-

- **Unhappy** with job
- **Dissatisfied** with pay
- **Stressed up** about career
- **Disappointed** with lifestyle
- **Give up**, changing the industry
- **Loose** confidence
- **Loose** better opportunities
- **Suffer** illness for lifetime!!!

“What you **deserve**, you **get**”

Navigating crisis – the infin i way -

- Go with the change
- Acquire new skills
- Be deserving for new opportunities
- Upskill,
- Reskill &
- Upgrade...
